

Test C: Heise (2024) life-cycle moments on Belgian B2B

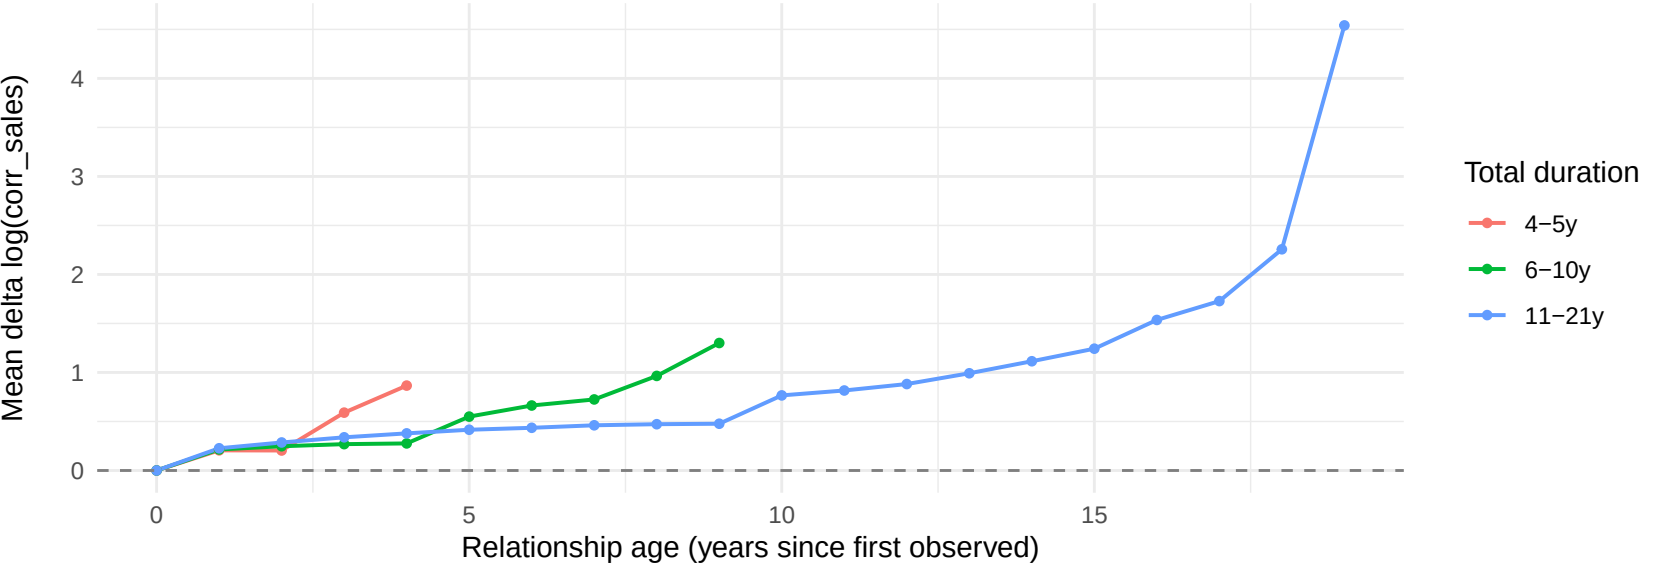

Active pair-years: 230522747. Pairs (non-LC): 72307437.

C1: pair-length distribution (non-left-censored)

C2: log trade volume life-cycle

Within total-duration cohort, mean $\log(\text{corr_sales}) - \log(\text{corr_sales at age 0})$

C3: break-up hazard by pair age

Hazard = $P(\text{pair ends in year } t \mid \text{active in year } t, \text{age}=\tau)$. Excludes left-censored pairs.
